

6516205804.txt

This is America. Only a communist would try to stop a service such as XM's. It is a service that we pay for and depend on for up to date warnings regarding severe weather and Amber alerts as well as the traffic. Living in Georgia the weather is of great importance and the Amber alerts offer the vehicle description and plate number on the monitor.

If you vote against XM you are listening to idiots with deep pockets and not the millions across America who depend on this service and vote.
